TEACHING METHOD

Our courses are designed to engage students with practical hands-on experiences, instead of long, dull & tedious theories.

Inclusive of:

- Goodie Bag.
- Unlimited Refreshments
- Training Materials
- Training Exercises
- Certificate of Completion (with at least 75% attendance)
- Access to Trainee Platform – WhatsApp & Telegram
- Access to Freelancing Platform – WhatsApp & Facebook Group – Only by invitation!
- Chance to join CAD Drafting Singapore as a Full-time or Part-time Drafter/Modeller.

Remarks:

- Our classrooms' equipment and fixtures are SD Protective Coated.
- Our classrooms' training desks are spaced 1.5m apart from one another.
- Masks to be worn at all time.

“

The instructor is patient to teach in different way to make you understand all topics. Best instructor with excellent Autocad knowledge.

“

“I’m so glad I decided to take this course, it is especially useful for beginners like myself with no prior experience with Autocad. Instructor Kenn was friendly and supportive, he was very thorough and patient throughout, which makes learning so much easier. Please pass on my thanks to Kenn, he has been a great source of guidance and insight. The material provided is also easy to understand and informative. This beginner course is reasonably priced and I can’t recommend this course highly enough. I finished the course feeling confident and is keen to take up more courses at CAD drafting Singapore. Thank you!”

“

Kenn is very professional pertaining to all course enquiries. Very meticulous and patience and will check from time to time to ensure student can keep up with the course. Well done.
